## EDUCATION

**Ho Chi Minh City University of Foreign Languages - Information Technology** Ho Chi Minh City  
*Bachelor of Software Engineering* 2023 - 2027

## TECHNICAL EXPERIENCE

**Full-Stack Web Development** 2024 – Present

*Personal Projects*

- Developed full-stack web applications using React.js and Next.js with TypeScript.
- Built backend services using Node.js and Express.js, implementing RESTful APIs.
- Designed and integrated MongoDB and PostgreSQL databases for data persistence.
- Implemented CRUD operations, filtering, pagination, and search functionalities.
- Styled responsive user interfaces using Tailwind CSS.
- Handled client-server communication and asynchronous data fetching.
- Used Git for version control and managed project structure independently.

**Desktop Application Development** January 2025

*Personal Project*

- Built a desktop application to practice application structure and user interaction using Java.
- Implemented core features such as data input, processing, and local data storage.
- Applied object-oriented programming principles in application design.
- Worked with event-driven programming and basic UI components.

**Distributed Database Fundamentals** 2024 – 2025

*Academic & Practical Learning*

- Studied distributed database concepts including data partitioning and replication.
- Worked with distributed data models to understand consistency and availability trade-offs.
- Applied basic principles of distributed systems when designing database-backed applications.

## PROJECTS

**Cryptocurrency Dashboard** | *TypeScript, Next.js, MongoDB, Docker* September 2025 – October 2025

- Developed a full-stack cryptocurrency dashboard using Next.js and TypeScript.
- Integrated third-party REST APIs to fetch real-time cryptocurrency prices and market data.
- Designed interactive data visualizations to display price trends and market changes.
- Containerized the application using Docker for consistent development and deployment.

**PPDS Task Management** | *TypeScript, Next.js, MongoDB* January 2026 – Present

- Developed a full-stack task management web application using Next.js and TypeScript.
- Designed and implemented RESTful APIs for task creation, update, deletion, and status tracking.
- Integrated MongoDB for persistent data storage and efficient task querying.
- Built responsive and user-friendly UI to manage tasks, priorities, and deadlines.

## TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript, HTML, CSS, Java (basic)

**Frontend:** React.js, Next.js, Tailwind CSS

**Backend:** Node.js, Next.js, Express.js, SpringBoot

**Databases:** MongoDB, PostgreSQL

**Tools:** Git, Github, Docker, VS Code
