Pham Viet Thanh

Fullstack Developer Intern (Backend-oriented)

Số điện thoại: 0396200543

Email: thanhagar209@gmail.com

Portfolio: https://thanhpham.vercel.app/

Github: https://github.com/Thanhbo209

LinkedIn: linkedin.com/in/phmthanh

Địa chỉ: Quận Phú Nhuận, TP. Hồ Chí Minh

OBJECTIVE

Short-term Goal:

- To gain hands-on experience in a professional software development environment, strengthen backend development skills, and learn real-world system workflows and best practices.
- Applying for the Fullstack Developer Intern position, with a primary focus on backend development.

Long-term Goal:

- To grow into a strong backend-focused developer, take on greater technical responsibility, and advance toward senior or lead-level roles through continuous learning and real-world experience.

EDUCATION

2023 - 2027

Ho Chi Minh City University of Foreign Languages - Information Technology Ho Chi Minh City
Bachelor of Software Engineering
GPA (Recent semester): 3.2 / 4.0

ACADEMIC & PERSONAL PROJECTS

2024 - Present

Full-Stack Web Development
Personal Projects

- Developed full-stack web applications using React.js and Next.js with TypeScript.
- Built backend services using Node.js and Express.js, implementing RESTful APIs.
- Designed and integrated MongoDB and PostgreSQL databases for data persistence.
- Implemented CRUD operations, filtering, pagination, and search functionalities.
- Styled responsive user interfaces using Tailwind CSS.
- Handled client-server communication and asynchronous data fetching.
- Used Git for version control and managed project structure independently.

January 2025 - April 2025

Desktop Application Development
Personal Project

- Built a desktop application to practice application structure and user interaction using Java.
- Implemented core features such as data input, processing, and local data storage.
- Applied object-oriented programming principles in application design.
- Worked with event-driven programming and basic UI components.

CERTIFICATIONS

2025 - May 2026 TOEIC Listening & Reading Preparation (Aim For: 850+) (Mock Test 775)

SKILLS

Languages:
TypeScript, JavaScript, Java, HTML, CSS

TypeScript(Focus): Used for building type-safe backend APIs and frontend applications.
JavaScript: Applied ES6+ features in web development and API integration.
Java: Used as the primary language for object-oriented programming and academic backend projects.

Frontend Framework: React.js, Next.js, Tailwind CSS	**React.js:** Built component-based user interfaces and handled client-side state. **Next.js:** Developed web applications with routing, SSR, and API integration. **Tailwind CSS:** Implemented responsive UI layouts using utility-first styling.
Backend Framework: Spring, Node.js, Express.js	**Node.js:** Built server-side applications and RESTful APIs. **Express.js:** Implemented routing, middleware, authentication, and request handling. **Spring:** Developed Java backend services and REST APIs.
Database: MongoDB, PostgreSQL	**MongoDB:** Designed document schemas, implemented CRUD operations, indexing, and handled transactions in backend APIs. **PostgreSQL:** Designed relational schemas, wrote SQL queries, and managed transactions to ensure data consistency.

INTERESTS

- Problem solving through software development.
- Independent coding and personal project building.
- Creating and implementing new project ideas.

PROJECTS

September 2025 - October 2025

Cryptocurrency Dashboard
Fullstack Developer

- Developed RESTful APIs using **Next.js** to aggregate and process cryptocurrency market data.
- Built dashboard interfaces using **Next.js**, **TypeScript**, and **Tailwind CSS.**
- Integrated third-party cryptocurrency APIs and handled data synchronization.
- Optimized data queries and handled error and rate-limit scenarios from third-party APIs.

January 2026 - Present

PPDS Task Management
Fullstack Developer

- Developed dashboard interfaces using **Next.js**, **TypeScript**, and **Tailwind CSS**, built RESTful APIs with Server Actions **Next.js** and **MongoDB** for data management.
- Implemented authentication and data management.
- Supported frontend dashboards with structured and secure API endpoints.

October 2025 - December 2025

Education Portal
Fullstack Developer

- Implemented role-based access control (**Teacher / Student**).
- Enabled teachers to create and manage classes, and students to join classes.
- Built frontend using **React.js**, **TypeScript**, and **Tailwind CSS.**
- Developed RESTful APIs with **Express.js** and **TypeScript.**
- Designed and managed relational data using **PostgreSQL.**
