Pham Viet Thanh

Fullstack Developer Intern

Dedicated **Software Engineering Intern** focused on mastering professional workflows and building high-quality full-stack solutions (Both Frontend & Backend). My goal is to contribute effectively to team projects while developing the technical expertise and leadership mindset required to become a **Senior Developer**.

EDUCATION

Ho Chi Minh City University of Foreign Languages – Information Technology (HUFLIT)

Bachelor of Software Engineering

2023 - 2027

GPA: **3.4 / 4.0**

CORE COMPETENCIES

CS Core: Data Structures & Algorithms, OOP, Design Patterns.
Architecture & API: System Design, Microservices, RESTful API Design.
Best Practices: Refactoring, Problem Solving, Critical Thinking.

CERTIFICATES

2025 - Present

SKILLS

Programming Languages
- TypeScript, JavaScript, Java, Python.

Frontend
- React, Next.js, Vite, Tailwind CSS.

Backend
- Node.js (Express), Java (Spring Boot, Spring Data JPA)

Databases
- MongoDB, MySQL, PostgreSQL, SupaBase.

Tools
- Git, GitHub, Docker.

English
- Technical Writing, Reading, Basic Communication.

EXPERIENCE

Sep 2023 - Present

Academic Experience

Software Engineering Student — Academic Projects

- Developed desktop, mobile, and web applications using .NET and Spring Boot as part of academic coursework
- Designed and implemented RESTful APIs for user authentication and data management
- Applied MVC architecture and structured backend logic for maintainable systems
- Collaborated in team-based projects using Git for version control and code integration

Jan 2024 - Present

Personal Development Experience

Self-Directed Website Developer

- Built full-stack web applications using Next.js, React.js, and MongoDB (MERN stack)
- Developed dynamic and responsive user interfaces using TypeScript and modern React patterns (hooks, component-based architecture)

TOEIC (Reading & Listening)
855 Mock Test (B2 level, official certification in progress for 850+)

- Integrated frontend with backend APIs, managing state, data fetching, and application flow
- Continuously improved code quality through refactoring and adopting best practices

PROJECTS

Feb 2026 - Mar 2026

AI-POWERED RESUME OPTIMIZER & ATS ANALYZER

Role: Fullstack developer

Link Demo: *https://ai-powered-resume-tracking.vercel.app/*
Tech Stack: React Router v7, Tailwind CSS, Puter.js (Cloud Infrastructure), OpenAI/NLP API.
Key Features:

- Developed a full-stack system using Puter.js to store resumes and compare them with Job Descriptions.
- Created a scoring system to rate resumes based on ATS compatibility, keywords, and structure.
- Used OpenAI/NLP to find missing skills and give suggestions to improve the resume.
- Built a dashboard to show match scores and real-time tips for users.

Jan 2026 - March 2026

PERSONAL PORTFOLIO & CREATIVE SHOWCASE

Role: Fullstack developer

Link Demo: *https://thanhpham.vercel.app/*
Tech Stack: Next.js, TypeScript, Tailwind CSS, MongoDB.
Key Features:

- Built a drawing tool using Canvas API so users can draw directly on the website.
- Used Next.js Route Handlers and MongoDB to fetch and store project data.
- Designed a clean and responsive UI with Tailwind CSS that works well on mobile.
- Optimized images and media for faster loading and better SEO.

March 2026 - April 2026

GROCERY E-COMMERCE PLATFORM

Role: Fullstack developer

Github: *https://github.com/Thanhbo209/grocery-ecommerce*
Tech Stack: React, TypeScript, Node.js, MongoDB, Tailwind CSS, ShadcnUI.
Key Features:

- Built a secure authentication & authorization system using JWT and Bcryptjs for both users and admins.
- Structured the backend into modules, easily manage products, users, and orders.
- Added Pagination and Filtering for products to make the website run faster.
- Used React Hook Form and Zod to check and validate data in forms.
- Built an Admin page to manage products, categories, payments,... using Axios.
- Used GitHub branches to manage code and work more professionally.
